

MINI INCUBATOR

Incubator 10L Analog

overview

Analog 10 l incubator is compact and economically priced, yet offers features not typically found in a basic incubator. The housing is all metal, as is the door frame. See-through acrylic door lets you view contents without opening the door. One shelf is included, and can be adjusted to two different levels.

The heating elements in the incubator are incorporated into the bottom and sides of the aluminum chamber. This provides better temperature stability and uniformity than other incubators in its class. A grommet hole in the top of the unit can hold a thermometer for accurate temperature setting.

features

- ✓ Small Bench Top Incubator
- ✓ Door with large window
- ✓ Precise temperature control by hydraulic thermostat
- ✓ Ideal for microbiology or hematology applications
- ✓ Corrosion resistant chamber
- ✓ Three shelf levels

techspecs

Temperature range

Ambient +5°C to +60°C

Stability

±0,6°C at 37°C

Power source

230 V / 50-60 Hz

115 V / 50-60 Hz

70VA

Capacity

10 liters

Dimensions (W x D x H)

285 x 280 x 335 mm

Weight

approx. 8.3 kg
